PROFESSIONAL SUMMARY

SOC Analyst (Tier 1) with practical experience in security monitoring, SIEM alert triage, and log analysis. Completed 20+ hands-on SOC labs and a cybersecurity internship focused on Windows Event Log investigation, IOC identification, and network traffic analysis. Experienced with Splunk, Elastic Stack, Wireshark, and TCP/IP protocols to detect suspicious activity. Familiar with the MITRE ATT&CK framework for mapping attacker techniques and supporting incident response workflows.

EXPERIENCE

TryHackMe – Cybersecurity Self-Study & Labs

Jan 2024 – Present

- Completed 20+ SOC labs covering phishing analysis, network traffic monitoring, log investigation, and malware triage
- Analyzed Windows Security Event Logs (Event IDs 4625, 4672, 4688) to detect failed logins, privilege escalation, and lateral movement attempts
- Extracted 15+ Indicators of Compromise (IOCs) per lab including IPs, domains, and hashes and validated them using VirusTotal
- Applied MITRE ATT&CK framework to map attack stages across 10+ simulated incident scenarios

Cybersecurity Intern

Codec Technologies Pvt. Ltd. — Remote

Jun 2025 – Jul 2025

- Triage and investigated 10+ security alerts per week using SIEM tools, reducing average alert review time through structured log correlation.
- Analyzed network traffic and Windows Event Logs to identify 5+ suspicious activity patterns and escalate confirmed incidents.
- Wrote structured incident reports for each escalated event, covering timeline, affected assets, and recommended remediation steps.
- Mapped observed attacker behaviors to MITRE ATT&CK; techniques to support threat classification during investigations.

EDUCATION

Sadakathullah Appa College, Tirunelveli, B.Sc

05/2027

Information Technology

TECHNICAL SKILLS

- SIEM Tools: Splunk, Elastic Stack (ELK)
- Security Monitoring: Alert Triage, Log Analysis, Security Event Correlation
- Threat Intelligence: VirusTotal API, URL Reputation Analysis, IOC Analysis
- Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, Packet Analysis
- Security Tools: Wireshark, Sysmon, Windows Event Viewer, Burp Suite
- Frameworks: MITRE ATT&CK, OWASP Top 10, NIST Cybersecurity Framework
- Operating Systems: Windows, Linux

PROJECT

ThreatScope – Phishing & URL Threat Analysis Tool

Live Project: threatscope-five.vercel.app

- Developed a web-based phishing detection platform that analyzes suspicious URLs using threat intelligence check
- Integrated VirusTotal API to perform automated URL reputation analysis and malicious indicator detection
- Processed 50+ test URLs to validate phishing detection accuracy and threat classification
- Built a cybersecurity dashboard UI to display phishing risk indicators and investigation results
- Improved threat investigation workflow by enabling real-time URL analysis for suspicious links
